EXPERIENCE

Videa — Nov 2025 – Present

Sr. Software Engineer

- Sole engineer on **Ambient Intelligence**, an LLM pipeline scoring clinician–patient conversations from visit audio; authored its **data-layer and versioning RFCs/ADRs** and shipped design → production in **~3 weeks**; now sold to multiple DSOs
- Built the **speaker diarization platform** (self-hosted pyannote GPU service + role attribution) for **every Voice Notes practice**, ~28K audio-hrs/mo; L40S spot made it **2.9× faster, 2.6× cheaper**
- Extended signals to **all visit types** (72% of sessions had yielded nothing) via shadow-gated rollout (**423 passes, 0 failures**); added transcript grounding and **LLM-judge A/B evals**
- Built **LLM claim narratives** (Langfuse) and an **image quality ML service** serving the largest DSO; led the org-wide **LangSmith agent-platform evaluation**

OXOS Medical — Nov 2023 – Nov 2025

Sr. Software Engineer II

- Built a custom **Yocto Linux distro** for medical imaging devices — reduced boot time and storage usage by **50%**; developed BSPs and enabled secure **A/B OTA updates** with Mender
- Migrated CI/CD from on-prem Jetsons to autoscaled **GCP Kubernetes** using multi-platform, multi-architecture Docker images — cut build times by **5×** and operational costs by **40%**
- Migrated executables to **Bitbake**, enabling host-independent cross-compilation with artifacts published to a private APT repo — improved developer productivity by **30%**
- Led **org-wide cloud migration** and served as key resource for security best practices; negotiated **$100k Google Cloud credits** for **$80k+ savings**

Joyn — May 2023 – Oct 2023

Founder & Chief Technology Officer

- Co-Founded Joyn, an AI-powered **end-to-end encrypted** messaging platform; raised **$200k pre-seed** from angels
- Architected and shipped a real-time app for **iOS, Android, macOS, Windows and Web** with Flutter and a NestJS backend; used by C-suite execs to close an **Asia ↔ US SPAC deal** end-to-end
- Achieved **58.3% 28-day user retention** — 95th+ percentile for social apps

Mount — Jan 2020 – Apr 2023

Founder & Chief Technology Officer

- Co-Founded Mount — peer-to-peer rental marketplace; raised **~$4M** from **Tribeca Venture Partners** and **General Catalyst**; named **PhocusWire Top 25 Startup '23**; built team to **12**
- Architected the Mount platform (Web) and iOS/Android apps for **rentals, intelligent asset tracking, and revenue management**, with simultaneous deploys to App Store, Play Store, and Web
- Built the Mount API in **FastAPI (Python)** as a drop-in solution for hosts seeking customization — deployed with enterprise-grade security on Google Cloud, designed for scale

EDUCATION

Boston University

Master of Science in Computer Science, GPA 3.95

Boston University

Bachelor of Arts in Computer Science, Bachelor of Arts in Chemistry, CS Major GPA 3.65

SKILLS, CERTIFICATIONS & ACHIEVEMENTS

Languages: Python, TypeScript, JavaScript, Dart, SQL, Java, Swift
AI / ML: LLM pipelines & evals, LangSmith / Langfuse, speech (diarization, STT), TensorFlow, OpenCV
Backend & Frontend: FastAPI, NestJS, PostgreSQL, REST APIs, React, Flutter
Infrastructure: Google Cloud, AWS, Kubernetes, Docker, Terraform, Yocto / Embedded Linux, CI/CD
Certifications: Google Cloud Professional Cloud Architect (May 2024) · **Publication**: *EyeSpace* — IoT assistive tech paper
Achievements: MLH Top 50 '23; BU Venture Comp. Winner '21; BU Spark! Advisory Council; MassChallenge judge
