EXPERIENCE

Videa

Nov 2025 – Present

Sr. Software Engineer

- Built **LLM-powered claim narrative generation** with **Langfuse observability** on the Boson (RCM) platform — moved claims from manual justification to AI-assisted submission with structured decision support (reason / description / action) for dental practitioners
- Stood up an **end-to-end image quality ML service across 4 repos** (ML model → FastAPI service → API → React UI), surfacing real-time X-ray quality feedback inside the clinical workflow and replacing offline batch analysis
- Shipped a **claims Chrome extension and embedded mini-app** (~100 files across BE + FE) surfacing RCM data directly inside dental PMS software, removing context-switching for practice staff
- Authored **94 merged PRs** and reviewed **139 PRs** across **6 repos** in ~5 months — full-stack across Python/FastAPI, React/TypeScript, and ML infrastructure

OXOS Medical

Nov 2023 – Nov 2025

Sr. Software Engineer II

- Built a custom **Yocto Linux distro** for medical imaging devices — reduced boot time and storage usage by **50%**; developed BSPs and enabled secure **A/B OTA updates** with Mender
- Migrated CI/CD from on-prem Jetsons to autoscaled **GCP Kubernetes** using multi-platform, multi-architecture Docker images — cut build times by **5×** and operational costs by **40%**
- Migrated executables to **Bitbake**, enabling host-independent cross-compilation with artifacts published to a private APT repo — improved developer productivity by **30%**
- Led **org-wide cloud migration** and served as key resource for security best practices; negotiated **\$100k Google Cloud credits** for **\$80k+ savings**

Joyn

May 2023 – Oct 2023

Founder & Chief Technology Officer

- Co-Founded Joyn — an AI-powered, **end-to-end encrypted** communication platform; raised **\$200k pre-seed** from angel investors
- Architected and shipped a real-time app for **iOS, Android, macOS, Windows and Web** with Flutter and a NestJS backend; used by C-suite execs to close an **Asia ↔ US SPAC deal** end-to-end
- Achieved **58.3% 28-day user retention** — 95th+ percentile for social apps

Mount

Feb 2020 – Apr 2023

Founder & Chief Technology Officer

- Co-Founded Mount — peer-to-peer rental marketplace; raised **\$3.5M seed** from **Tribeca Venture Partners** and **General Catalyst**; named **PhocusWire Top 25 Startup '23**; built team to **12**
- Architected the Mount platform (Web) and iOS/Android apps for **rentals, intelligent asset tracking, and revenue management**, with simultaneous deploys to App Store, Play Store, and Web
- Built the Mount API in **FastAPI (Python)** as a drop-in solution for hosts seeking customization — deployed with enterprise-grade security on Google Cloud, designed for scale

EDUCATION

Boston University

Master of Science in Computer Science, GPA 3.95

Boston University

Bachelor of Arts in Computer Science, Bachelor of Arts in Chemistry, CS Major GPA 3.65

SKILLS, CERTIFICATIONS & ACHIEVEMENTS

Languages: Python, TypeScript, JavaScript, Dart, SQL, Java, Swift

AI / ML: LLM applications, Langfuse observability, prompt engineering, TensorFlow, OpenCV, Keras

Backend & Frontend: FastAPI, NestJS, PostgreSQL, REST APIs, React, Flutter

Infrastructure: Google Cloud, AWS, Kubernetes, Docker, Terraform, Yocto / Embedded Linux, CI/CD

Certifications: Google Cloud Professional Cloud Architect (May 2024) · **Publication:** *EyeSpace* — IoT assistive tech paper

Achievements: BU BUild Lab Venture Winner '21; MLH Top 50; 4× Dean's List; UROP '20
